The MNT MAG 8110 is a magnet mounting kit designed for TRACK 1000 and TRACK 1100 trackers. This kit provides a secure magnetic mounting solution for metal surfaces.

Compatible devices

The MNT MAG 8110 is compatible with the following tracker models:

- TRACK 1000
- TRACK 1100

Kit contents

Content

The kit includes:

- 2x M6 x 16 bolts
- 2x magnets with internal thread
- 2x washers

Installation steps

Step 1: Place the tracker on the magnets

Place the tracker on top of the magnets. Make sure the metal protection on the magnets is facing up.

Step 2: Line the washers

Line the washers on top of the tracker's mounting holes.

Step 3: Tighten the screws

Tighten the screws on the magnets to secure the tracker in place.

> After installation, verify that the tracker is securely mounted and the magnets are firmly attached to the metal surface.

Installation checklist

Before completing the installation, verify the following:

- [ ] All kit components are present (2 bolts, 2 magnets, 2 washers)

- [ ] Metal protection on magnets is facing up
- [ ] Washers are properly positioned on mounting holes
- [ ] Screws are tightened securely
- [ ] Tracker is firmly mounted and stable
- [ ] Magnets are securely attached to the metal surface
